Opioid LAN Measures

This LAN includes the reporting and tracking of various measures to assist participants with capturing meaningful metrics that demonstrate hospital performance and that of the overall collective impact of participants. This LAN has created six (6) measures that aim to capture aspects of care relevant to the goals and key topics. No current standardized or endorsed measures exist for the emergency department setting related to the goals of this LAN, therefore requiring the creation of custom metrics based on participant input with guidance from the LAN program advisors. These six measures and their data definitions follow.

1. Total Number of Opioid Use Disorder encounters
2. Number of overdose encounters
3. Number of patients to whom MAT was initially administered in the emergency department for:
 - a. Number of patients to whom MAT was initially administered in the emergency department for Subsequent to an OUD-related encounter
 - b. Number of patients to whom MAT was initially administered in the emergency department for Subsequent to an overdose encounter
4. Number of patients engaged by a Certified Peer Recovery Specialist
5. Number of patients prescribed buprenorphine (or equivalent) for home induction
6. Number of patients prescribed naloxone on discharge from emergency department

Encounter Volume

Opioid Use Disorder (OUD) - Related encounters

Definition:	The number of encounters related to Opioid Use Disorder
Numerator:	Total number of OUD-related encounters
Denominator:	N/A
Source:	Hospital-Reported
Data Submission:	Monthly
Notes:	See <i>Opioid Use Disorder</i> Diagnosis Codes in the data dictionary. When searching for claim-based codes, the search should include the first nine (9) billable codes specified on the patient encounter.

Overdose encounters

Definition:	The number of encounters related to overdose
Numerator:	Total number of overdose-related encounters
Denominator:	N/A
Source:	Hospital-Reported
Reporting Period:	Monthly
Notes:	The <i>Overdose-Related Encounter Diagnosis Codes</i> section in the data dictionary contains the ICD-10 category and sub-category classifications for overdose-related encounters. When searching for claim-based codes, the search should include the first nine (9) billable codes specified on the patient encounter.

Medicated assisted treatment (MAT) in the Emergency Department (ED)

Subsequent to an OUD encounter

Definition:	The number of patients to whom MAT was initially administered in the ED subsequent to an OUD-related encounter
Numerator:	Total number of MAT inductions subsequent to an OUD-related encounter
Denominator:	N/A
Source:	Hospital-Reported
Data Submission:	Monthly
Notes:	Patients that receive MAT in the emergency department subsequent to an OUD-related encounter. A list of MAT medications and OUD-related encounter diagnosis codes can be found in the <i>Suboxone Buprenorphine Medications</i> and <i>Opioid Use Disorder Diagnosis Codes</i> sections in the data dictionary.

Subsequent to an overdose encounter

Definition:	The number of patients to whom MAT was initially administered in the ED subsequent to an overdose-related encounter
Numerator:	Total number of MAT inductions subsequent to an overdose-related encounter
Denominator:	N/A
Source:	Hospital-Reported
Data Submission:	Monthly
Notes:	Patients that receive MAT in the emergency department subsequent to an overdose-related encounter. A list of MAT medications and opioid overdose-related encounter diagnosis codes can be found in the <i>Suboxone Buprenorphine Medications</i> and <i>Overdose-Related Encounter Diagnosis Codes</i> sections in the data dictionary.

Certified Peer Recovery Specialist

Certified Recovery Specialist Engagement

Definition:	The number of patients engaged by a certified peer recovery specialist in the emergency department
Numerator:	Total number of patients contacted by a certified peer recovery specialist in the emergency department that had an OUD-related encounter or overdose-related encounter (as defined in the data dictionary's list of encounter codes)
Denominator:	N/A
Source:	Hospital-Reported
Data Submission:	Monthly
Notes:	A peer recovery specialist is someone who would be seen as a peer and has lived with addiction. Actual title may differ by facility. For example, peer specialist, recovery coach, or peer support specialist. A list of codes can be found in the <i>Opioid Use Disorder Diagnosis Codes</i> and <i>Overdose-Related Diagnosis Codes</i> sections in the data dictionary.

Prescriptions

Buprenorphine (or equivalent) Prescription for Home Induction

Definition:	The number of patients that received a prescription for Buprenorphine for home induction
Numerator:	Total number of patients that received a Buprenorphine prescription to be started at home
Denominator:	N/A
Source:	Hospital-Reported
Data Submission:	Monthly
Notes:	See the <i>Suboxone Buprenorphine Medications</i> section in the data dictionary.

Naloxone Prescription upon Discharge

Definition:	The number of patients that received a prescription for Naloxone upon discharge
Numerator:	Total number of patients that received a Naloxone prescription upon discharge from the ED
Denominator:	N/A
Source:	Hospital-Reported
Data Submission:	Monthly
Notes:	Indicate the number of patients who were prescribed Naloxone at time of discharge from the emergency department for these at-risk patients to reduce the impact of a future opioid overdose.

HQIP Measure Definition

The Opioid Use Disorder (OUD) for Emergency Department (ED) follow-up reports are generated using a Department of Human Services (DHS) modification on the HEDIS[®] measure “Follow-Up After Emergency Department Visit for Alcohol and Other Drug Abuse or Dependence (FUA)”.

While the HEDIS[®] measure is looking at all types of alcohol or other drug (AOD) abuse, the DHS modification limits the data included to only Opioid/Opioid Poisoning diagnoses. Also, the HEDIS[®] measure only evaluates the primary (or the first) diagnosis on the claim/encounter. The DHS modification includes diagnoses in up to the ninth position.

Each version applies a continuous enrollment limitation (from the date of the ED visit through 30 days after the ED visit - 31 days total) to the eligible denominator population. The DHS modification is limited to Medical Assistance recipients enrolled in a Medicaid MCO participating in the Physical Health HealthChoices program during that eligibility period.

The HEDIS[®] measure is very prescriptive and limited as to what is included as a follow-up and includes follow ups in both 7 and 30 days. The DHS modification includes all ED visits (with or without admittance) that received treatment, as identified by DHS, within 7 days of their OUD related ED visit. DHS will also include admissions that meet the modified inpatient criteria are included in the numerator. DHS will not consider another ED visit as an acceptable follow-up within 7 days.

This measure is being used to evaluate each ED visited by the recipients separately. If there were multiple ED visits to the same ED within 7 days and all visits include OUD related diagnosis in up to the ninth position, then DHS considers the first date of service to be “anchor date” or date to begin the evaluation. When a recipient has OUD related ED visits to multiple EDs within the 7 day follow-up period, DHS will evaluate each ED separately.
